## ABOUT THE COMPANY

David Engineering Limited having partnered with Tononoka Group is now operating as David Engineering Kenya Ltd. David Engineering has been in operation since 1998, Started as a small entrepreneurial company, has grown to be one of the leading player in the steel construction industry know for its custom designs, competitive pricing, quality, personal touch with the clients and efficiency.

In light of long – term sustainability and growth of the business, we strongly believe that this partnership will strengthen our reach together with our vast experience and expertise. It creates a strong platform to take on new and current challenges and exceed clients’ expectations by providing on spot steel solutions for both supply and steel structure fabrication services.

Tononoka group brings on board years of excellence in quality steel manufacturing, efficiency, reliability and a customer driven purpose that will see this new partnership excel in executing and service delivery of our core key business which remains steel fabrication and services.

Commitment to execute large custom made and complex jobs efficiently among others has enabled the company to gradually grow and establish goodwill among several well-known clients.

Our current capacity is approximately 5,000 Tonnes of steel annually.

Presently we have a workforce of about 200 permanent employees who are competent to ensure successful and efficient execution of jobs.

We are equipped with all the necessary machinery, tools, vehicles and cranes necessary for fabrication and installations.
